Designation – Software Developer

Worked on the HRMS (Human Resource Management System) project, developing and implementing features to streamline HR processes.

Testware Informatics Pvt Ltd • Chennai • Full-time

Feb 2022 – Dec 2022

I contributed to the creation of new applications from inception and played a key role in maintaining existing projects.

Designation – Flutter Developer

Bigblue Softwares Pvt Ltd • Kovilpatti • Full-time

Jan 2020 – Sep 2021

Contributed on diverse projects, expanding my skill set through hands-on experience in Flutter, Node.js, and MySQL.

Designation – Software Developer

PROJECTS

Reach – School App

This app enables communication between teachers and students. Students can manage assignments, leave requests, SOS services, attendance, and communication, while teachers can assign tasks, track attendance, chat, and use SOS features.

Technologies Used : Flutter, Dart, Express Js, Node Js, MySQL

Peace River

This project is designed to capture patient details from a form image and store them as PDFs. The information filled out by patients is saved in the database in PDF format for future reference.

Technologies Used : Swift UI, Express Js, Node Js, MySQL

Photo StudioApp

This project connects customers with studio owners via the app, allowing them to book event slots. After the event, customers can easily choose photos and videos for their albums within the app.

Technologies Used : Flutter, Dart, Express Js, Node Js, MySQL

E-Commerce Application - Demo

This WooCommerce project is tailored for online shopping, including features like product purchases, adding favorites, and payment integration. RazorPay was smoothly integrated for payment processing.

Technologies Used : Flutter, Dart, Woocommerce APIs

GreenPen - Education

A cutting-edge Virtual Learning Management System (VLMS) designed to simplify the creation and management of learning activities. It streamlines online class construction, student assessment, collaboration, and progress tracking.

Technologies Used : Flutter, Dart, Firebase, GetX

Tamil BTG - Spiritual

This app provides spiritual readings in Tamil, highlighting stories about Lord Krishna. It functions as an advanced e-magazine with features like dark mode, subscriptions, swipe-through, and filtered sections.

Technologies Used : Flutter, Dart, Woocommerce APIs

Adrenalin Max - HRMS

A comprehensive HRMS software, where I specialized in customization and maintenance to ensure optimal functionality.

Technologies Used : Flutter, Dart, Firebase

Innlyn

This project connects two users traveling to the same or nearby destinations using web sockets. It matches users on similar routes, enabling them to communicate directly through calls and chat.

Technologies Used : Flutter, Dart, Firebase, Web sockets, Google maps, Google places api, Zego cloud (in app call)

EDUCATION

B.Tech in Computer Science & Engineering • GPA - 59%

Aug 2013 - May 2017
